

Digital Forensics File Similarity Report

Case ID:	FH-2026-0002	Analysis ID:	AN-2026-0004
Case Name:	Luxman Kumar	Timestamp:	2026-08-15 08:17:53
Investigator:	admin	Classification:	OFFICIAL FORENSIC RECORD

0%
LOW SIMILARITY

Evidence File Details

Attribute	File A (Reference)	File B (Target)
Filename	luxman2.0 (1).pdf	ArtifactDev Labs.pdf
File Size	261,656 B	39,626 B
MIME Type	application/pdf	application/pdf
MD5	ae4d54e15b27a255032c6314f3ba2566	2fb6f60d0bc2d92be4c1c34877d0a100
SHA-256	05ec4a43a43cfb581501ace5fed0660fc72e05efbd2357d616e5df6373f924c3	1cf094db4db7d1d061db5f7e65f835261ebd522a2311d282be71ec68fff9db4d
ssdeep	3072:eRtd4l9qIH67fJg0ngnDPoMnjB2nyyCy7:ezs6H6y0ngToMjCyly7	768:eWzIBdSleAX7XamuzYnfukeswwCpPfWYhVgo1lb:e7BdmX7XadzhaHsnWYhVgo1lb
TLSH	T12C1E2A413FA2F76E5960695FEFAA5A5FFFFFFED6FAEA59156845E75BEAEAEFEE79FFEBF742181271803081009600005549E810D92991C1850A94D0F85A0C02EC078113D3	T12C1A2A32BEBABB6AA5B29A69FFFFFFFAFFFFFFFBFABFEEBAAAABBEADEAEFFAFFBFEBEAFEBBFA0041062144045240454144451515041440151450552412511000515590011801

Fuzzy Hash Breakdown

Algorithm	Metric / Output	Similarity Assessment
ssdeep (CTPH)	Score: 0 / 100	0% structural match
TLSH (Locality Sensitive)	Distance: 416	0% normalized similarity

Analyst Findings & Notes

The analyzed files exhibit little to no structural or byte-sequence overlap.

Forensic Methodology

Cryptographic hashing (MD5, SHA-256) calculates exact, tamper-evident digests where a single-bit edit results in complete avalanche divergence. Fuzzy hashing (ssdeep / CTPH and TLSH) evaluates similarity across modified, obfuscated, or variant binaries by analyzing localized byte sequence distributions and piecewise context windows.

Forensic Disclaimer & Investigative Guidelines

IMPORTANT NOTICE: Similarity assessment is an investigative file-relationship indicator and DOES NOT independently establish that a file is malicious. High similarity may indicate shared code libraries, common compilation toolchains, or legitimate software derivatives. Malware determination requires additional static, dynamic, sandboxing, YARA, PE section, and threat-intelligence analysis.
